ส่วนราชการ สำนักงานปลัดกระทรวงเกษตรและสหกรณ์ สำนักงานการเกษตรต่างประเทศ โทร. ๐ ๒๒๘๑ ๘๖๙๐

ที่ กษ.๐๒๐๔/ ๖๕๐๖ วันที่ ๒๕ มีนาคม ๒๕๖๙

เรื่อง ขอความอนุเคราะห์ประชาสัมพันธ์เครื่องจักรและเครื่องมือเกษตรของยูเครน

เสนอ กรมส่งเสริมการค้าระหว่างประเทศ

ด้วยกระทรวงการต่างประเทศมีหนังสือถึงกระทรวงเกษตรและสหกรณ์ แจ้งว่า สถานเอกอัครราชทูตยูเครนประจำประเทศไทย มีหนังสือ ที่ ๖๑๕๑๖/๒๒-๐๑๒-๓๐๑๑๙ ลงวันที่ ๙ มีนาคม ๒๕๖๙ นำส่งข้อมูลและรายละเอียดเกี่ยวกับสินค้าประเภทเครื่องจักรและเครื่องมือเกษตรจากสมาคมผู้ผลิตเครื่องจักรและอุปกรณ์ทางการเกษตร Ukragromash ของยูเครน เพื่อประโยชน์ในการสร้างความร่วมมือทางเศรษฐกิจระหว่างกัน รายละเอียดตาม QR Code แนบท้ายหนังสือ

สำนักงานการเกษตรต่างประเทศขอความอนุเคราะห์หน่วยงานท่านพิจารณาประชาสัมพันธ์เครื่องจักรและเครื่องมือเกษตรดังกล่าวของยูเครนให้ผู้สนใจทราบต่อไป

จึงเสนอมาเพื่อโปรดพิจารณา

วราวุธ ศิลปอาชา

Embassy of Ukraine
in the Kingdom of Thailand

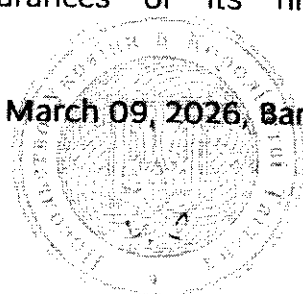

Nº 61516/22-012-30119

The Embassy of Ukraine in the Kingdom of Thailand presents its compliments to the Department of European Affairs of the Ministry of Foreign Affairs of the Kingdom of Thailand and has the honour to convey herewith the electronic catalog of the Association of Manufacturers of Agricultural Machinery and Equipment "Ukragromash" that brings together leading Ukrainian enterprises specializing in the production of modern equipment for soil cultivation, sowing, fertilization, plant protection, and grain processing. The catalogue is available at the following link: https://ukragromash.com.ua/images/doc/2025/Catalog_Ukragromash_EN.pdf

The Embassy of Ukraine would be highly grateful if the esteemed Department could kindly bring the catalogue to the attention of relevant organizations, industry associations, and members of the business community of the Kingdom of Thailand who may have an interest in establishing partnerships with Ukrainian manufacturers.

The Embassy of Ukraine in the Kingdom of Thailand avails itself of this opportunity to renew to the Department of European Affairs of the Ministry of Foreign Affairs of the Kingdom of Thailand the assurances of its highest consideration.

MACHINERY AND EQUIPMENT FOR THE AGRO-INDUSTRIAL COMPLEX

UKRAGROMASH is an industry association that has been successfully operating for over 15 years – since April 2010. It is a member of the Federation of Employers of Ukraine, the largest business association in the country.

The Association unites about 70 leading Ukrainian companies in the agricultural machinery and equipment sector, as well as research institutions and educational establishments.

UKRAGROMASH represents manufacturers that provide a full production cycle for modern agricultural machinery – from design and development to mass production of machines, equipment, and components.

The Association protects the common interests of Ukrainian manufacturers both domestically and internationally, helping the industry to grow, implement innovations, increase the level of production localization, and enhance the competitiveness of Ukrainian machinery in both domestic and global markets.

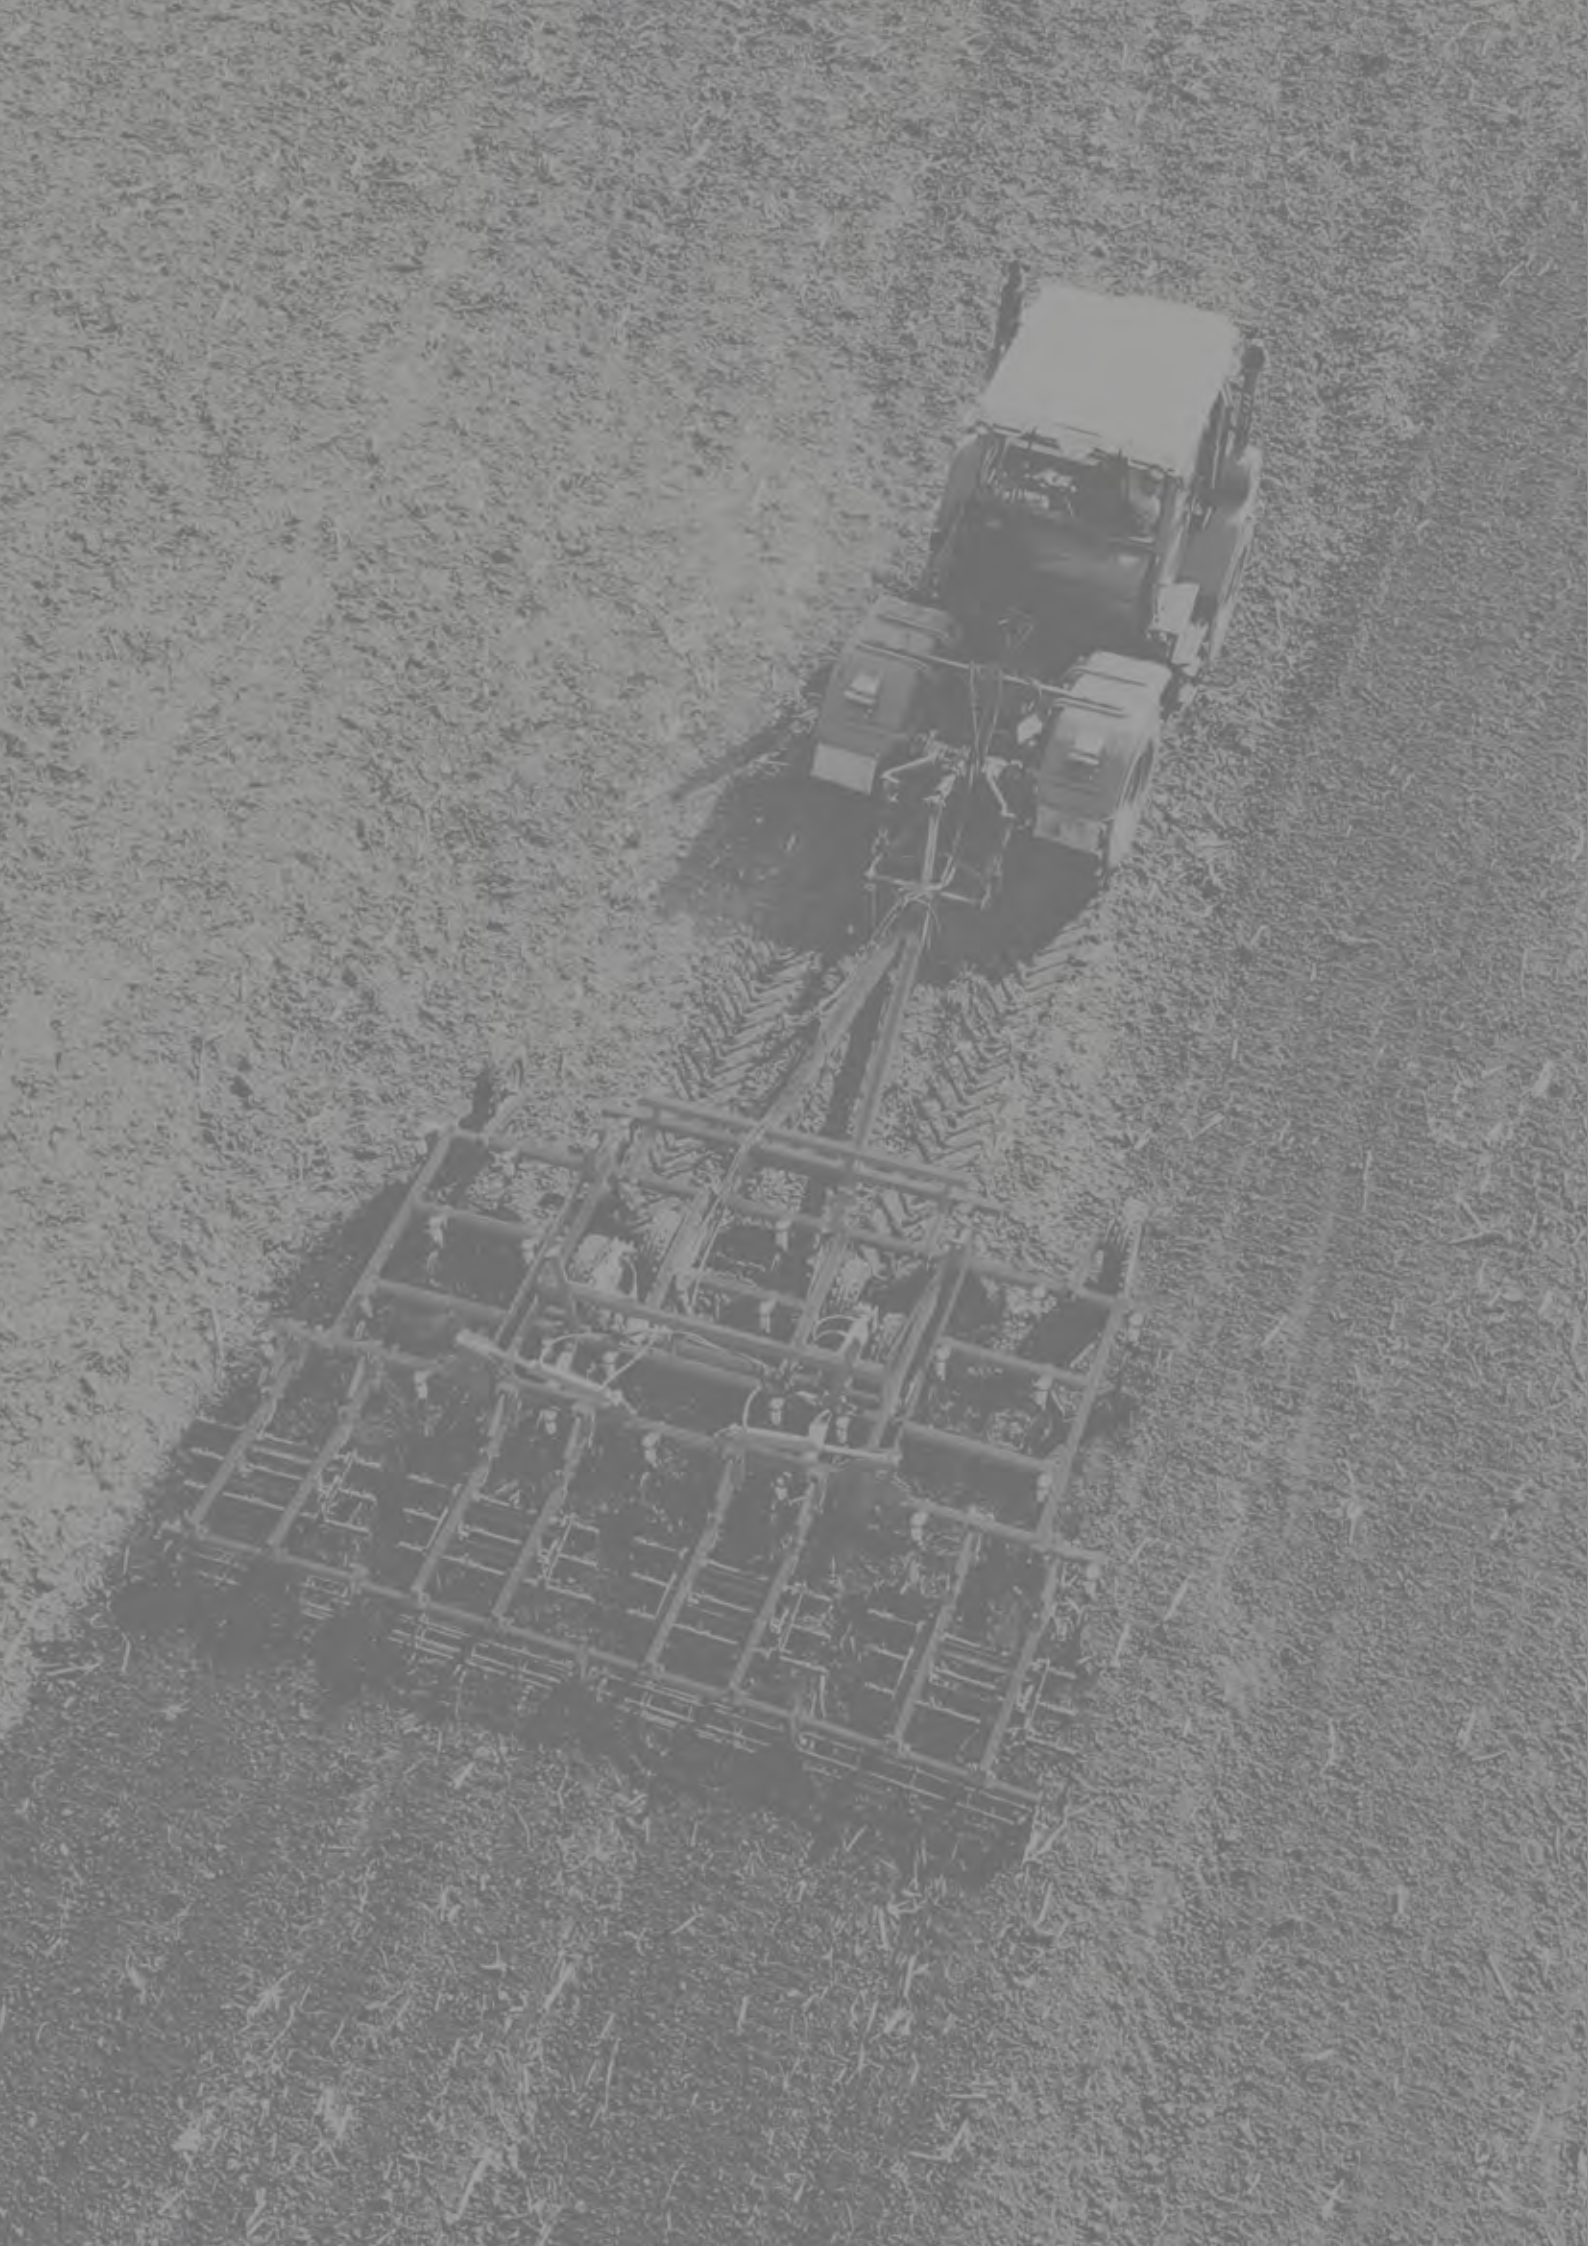

Today, **UKRAGROMASH** is a recognized leader in its field – a platform that unites companies capable of meeting the needs of the agricultural sector and successfully competing in both Ukrainian and international markets. This success is supported, in particular, by a state support program offering a 25% compensation, which has proven over the years that the partnership between Ukrainian farmers and industrial producers is effective and sustainable.

The joint efforts of the Association’s members contribute to the development of Ukrainian machine-building, the strengthening of technological independence, and the consolidation of Ukraine’s position as an industrial nation.

Together, we enhance the synergy of efforts aimed at improving business conditions, advancing the development of agricultural machinery manufacturing in Ukraine, and achieving international recognition.

"Ukraine must be an industrial country."

Anatolii Girshfeld
Chairman of the Council
of the Association «Ukragromash»

YIELD-BOOSTING TECHNOLOGIES

A manufacturer of multifunctional agricultural tillage and seeding machinery that upholds high quality standards while incorporating modern and cost-effective technologies.

The plant's advanced technical equipment, qualified personnel, talented team of engineers, and business connections with foreign suppliers enable it to promptly respond to trends and current needs of the agro-industrial market, as well as fulfill orders for the development of new models of tillage and seeding machinery.

Thanks to the implementation of high-strength steel processing technology, the lifespan of the tillage machinery's working parts, made from boron-containing steel, has been significantly increased.

The production process utilizes precision plasma cutting equipment, as well as machines with artificial intelligence that manufacture parts with maximum accuracy in 3D dimensions.

PRODUCES:

- Strip-till equipment
- Rotary and universal disc harrows
- Roller choppers
- Equipment for pre-sowing operations
- A wide range of seeders
- Cultivators
- Deep rippers
- Plows of various types
- Reapers and trolleys
- Fertilizer tanks
- Loaders
- Gardening tools
- Spare parts

The range of spare parts produced at the plant for domestic and foreign tillage and seeding machinery exceeds 5,000 items.

The export map covers countries across Asia, Eastern and Western Europe, Africa, and Australia.

Participant in the state program providing a 25% compensation for the cost of domestically produced machinery and equipment for the agro-industrial complex:

AGRICULTURAL TECHNOLOGIES IN HARMONY WITH NATURE!

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

The company produces over 40 types of high-quality products, taking into account all the requirements of farmers and cooperates with major operators in the agricultural machinery market, from 15 countries in Europe and Asia.

Today, the company is the national flagship of agricultural machinery manufacturing in Ukraine thanks to a first-class team of proactive and inventive engineers and professionals.

The company offers comprehensive solutions and a wide range of sowing and tillage equipment to ensure high quality and efficient implementation of technological processes in the shortest possible time.

PRODUCES:

- Pneumatic seeders
- Grain seeders
- Seeders for Precision Farming
- Full tillage cultivators
- Cultivators for row crops
- Double-row disc harrows
- Four-row disc harrows
- Sprayers

COMPANY ADVANTAGES:

- international experience;
- modern production;
- innovative equipment;
- products of the highest quality;
- work for many years.

Many years of experience in the market have allowed the company to prove its reliability, to gain a stable and honest reputation.

Production facilities are located on **72 000 m²**.

The staff consists of **550 people**.

Qualified support and after-sales service of equipment, direct communication with farmers, work to meet the needs of the consumer are the most important tasks of the company today.

**The leading manufacturer of sowing and tillage equipment
in Ukraine and Eastern Europe**

Favorit

Founded in 2003

SEEDING AND SOIL CULTIVATION EQUIPMENT FACTORY

High-quality agricultural machinery from Favorit is designed for tasks of varying degrees of complexity. Each model of machinery is a combination of unique characteristics and operational qualities that allow various types of work to be performed as quickly and efficiently as possible.

PRODUCES:

- Grain seeders
- Row crop seeders
- Disc harrows
- Rotary harrows
- Row crop cultivators
- Solid tillage cultivators
- Fertiliser spreaders
- Cultivators with dry and liquid fertiliser application
- Manipulators
- Cats-shredders
- Ploughs
- Shellers
- Compactors

The design bureau is constantly modernising existing equipment and developing new models, in particular for any tractor power and different working widths.

All products are certified according to both domestic and European requirements.

The company exports its products to Poland, Romania, Moldova, Kazakhstan, and Uzbekistan.

Over the years, the company has received awards such as 'Industry Leader', 'People's Brand', 'TOP20' and others.

EXCELLENT PERFORMANCE ON YOUR FIELD

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

The company specializes in the production of agricultural equipment for various types of soil cultivation, pre-sowing tillage, and operations on fields with a high amount of crop residues.

The Company Produces:

Affordable yet high-quality agricultural machinery for farmers, meeting the needs of both small farms – with equipment starting from 1.8 m working width – and large agroholdings with wide-cut implements up to 14-18 meters.

PRODUCT RANGE:

- Solid-tine cultivators (4- and 5-row)
- Inter-row cultivators.
- Pre-sowing seedbed cultivators (compactors)
- Disc harrows
- Premium-class disc harrows
- Deep rippers
- Rolling cutters and shredders
- Soil tillage systems
- Row-crop seeders
- Grain seeders
- Front loaders
- Fertilizer spreader trailers and attachments for loaders (buckets, hooks, grabs, etc.)

MAIN AREAS OF ACTIVITY:

- Production and sales of agricultural machinery and spare parts
- Commercial distribution of machinery and components from other agricultural manufacturers
- Restoration and modernization of domestic and foreign agricultural equipment

Service and Support:

ARK-GROUP provides warranty and post-warranty service **24/7 anywhere in Ukraine.**

AgroKalina

Founded in 2002

TECHNOLOGY – FERTILITY – RESULT!

The company develops, manufactures and sells high-quality agricultural machinery that meets the most demanding needs of farmers and agricultural companies.

The design of the machinery and equipment is tailored to modern agronomic farming methods, which help agricultural producers achieve high yields at minimal cost.

The company offers a wide range of machinery and equipment that has proven its effectiveness both on small farms and in large agricultural holdings.

PRODUCES:

- Rotary, tine, and spring harrows
- Row crop and strip till cultivators
- Vertical tillage equipment
- Compactors
- Disc harrows
- Chisel ploughs
- Soil cultivation systems
- Universal sowing complexes
- Seeders for a wide range of applications

Thanks to continuous improvement, quality control, an individual approach, and constructive solutions, the company is able to satisfy the maximum requirements and needs of its customers.

Service support and the spare parts department are always quick to respond and provide everything necessary for reliable operation

LOZOVA MACHINERY

Founded in 1966
LOZOVA MACHINERY brand
established in 1999

MONEY WORKS!

LOZOVA MACHINERY is modern agricultural equipment that combines innovation,
energy efficiency, and reliability.

The company builds on the long-standing expertise of the Lozova Forging and Mechanical Plant,
which has been producing high-quality machinery for farmers for over seven decades.

LOZOVA MACHINERY equipment stands out for
its exceptional quality, durability, and low maintenance costs – proven by both laboratory research
and field performance.

The product range includes a wide selection of
tillage implements designed to deliver maximum
efficiency and resource savings.

PRODUCT RANGE:

- Disc harrows
- Heavy disc harrows
- Light spring-tine harrows
- Spring-tine harrows
- Heavy-duty spring-tine harrows
- Drag harrows
- Rotary harrows
- Seedbed cultivators
- Field cultivators
- Subsoilers

Our engineering center develops equipment
using state-of-the-art software for precise mathematical modeling and advanced structural
analysis.

We actively collaborate with leading universities
and research institutes in Ukraine and abroad.
These partnerships help us continuously improve
tillage quality and refine our technological solutions.

**A trusted manufacturer of modern, energy-efficient,
and reliable agricultural machinery.**

RELIABLE EQUIPMENT FROM A UKRAINIAN MANUFACTURER!

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

The company produces over 60 models of agricultural machinery
and over 2,600 items of spare parts for it.

All equipment undergoes technical tests at the company's experimental stands, and then in real field conditions.

100% of components for our own equipment, as well as consumables, are produced directly by the company itself, so they are always available in stock, which is very important for ensuring the uninterrupted operation of the unit during the height of the season.

PRODUCES:

- Rotary and trailed harrows
- Grain loaders
- Cultivators
- Heap cleaners
- Fertilizer spreaders
- Crushing rollers and compacting rollers

COMPANY ADVANTAGES:

- Honesty in relationships
- Reliability of equipment and spare parts in operation
- The innovation of new and improved models..

The design and experimental departments are constantly improving existing models and developing new ones. The company has patents issued by the State Intellectual Property Service of Ukraine, which mark and protect its own innovative developments.

All equipment is covered by a 12-month warranty period.

ua.orehovselmash.com

A company that's growing dynamically and holds leading positions among agricultural machinery manufacturers not only in Ukraine but also abroad.

For over two decades, we've been building more than just machinery – we've been building trusted partnerships with farmers. Every unit we produce is the result of a deep understanding of the agricultural sector's needs, rigorous testing, and continuous improvement.

Agromash products are well known among farmers in Ukraine, Romania, Moldova, the Republic of Kazakhstan, and Lithuania, where they have rightfully earned a reputation for being reliable machinery.

PRODUCES:

- Disc harrows
- Rotary harrows
- Cultivators
- Chisel Deep Looseners
- Hydraulic Couplers
- Discators

COMPANY ADVANTAGES:

Tested Quality: Every machine undergoes rigorous quality control and strength testing to meet modern agro-technological standards.

Full Service & Support: From equipment selection to staff training and maintenance – our specialists are with you every step of the way.

Constant Innovation: We incorporate cutting-edge engineering solutions, listen to farmer feedback, and update our model range according to market needs.

Ukrainian Manufacturing: By supporting Agromash, you invest in domestic production, create jobs, and help grow the country's agricultural industry.

QUALITY PROVEN OVER THE YEARS

VOSKHOD

Founded in 2003

The enterprise carries out a full production cycle, from supplying metals and components to manufacturing products. The entire range of agricultural machinery is produced using modern technological equipment.

The enterprise manufactures a broad range of equipment designed for efficient soil cultivation and agricultural land maintenance under the VOSKHOD and SKHID trademarks.

PRODUCES:

- Three-row disc harrows with adjustable disc angle (660 mm discs)
- Two-row disc harrows with front shredders (660 mm discs)
- Disc harrows-stubble cultivators with serrated "daisy-type" discs or tubular Super Sharp discs (500/520 mm)
- Rotary harrows
- Spring harrows / tine harrows
- Field cultivators for general tillage, (three- or five-row configuration) equipped with harrows and rollers
- Tooth-ring rollers, spiked rollers, roller shredder
- Subsoilers (deep rippers)

The company's development was achieved through consistent implementation of marketing and technological policies, focusing on stabilizing and expanding production capacities, introducing European and Western innovations into manufacturing, and strengthening partnerships with international companies. These efforts positively impacted on the reliability and durability of each machine. All products undergo strict quality control procedures at every stage of manufacturing, from metals and complements' supply to release of finished machinery.

Company's products have repeatedly achieved certificates and awards during national and international exhibits, which confirm high quality and the technological level of this Ukrainian enterprise.

HARTEHPROM-97 (TM Sloboda)

Founded in 1996

QUALITY PROVEN OVER TIME!

Production enterprise under the trademark "Sloboda" manufactures a wide range of soil cultivation agricultural units (over 20 series, about 140 models), as well as spare parts and components for them.

PRODUCES:

- Three-row (series "3R"), four-row (series "Sloboda") and five-row (series "Artos") cultivators for continuous soil cultivation
- Mounted and trailed disc cultivators on spring tines (series LDN/LDP) and on damper tines with rubber shock absorbers (series LDN/LDP Strong)
- Stubble and combined disc-tine cultivators of the Target and Target Combi series
- API injection applicators for liquid fertilizer application using CULTAN technology
- Vertical tillage cultivators using VertiTill technology, KVO series
- Deep rippers of the SGR series
- Disc harrows for primary tillage (series ADN/ADP, ADNT/ADPT)
- Heavy disc cultivator LDT
- Mounted and trailed spring-tooth harrows ZBR

The product range meets the needs of both small farms and large agricultural holdings with significant land areas – working widths of soil cultivation units range from 2 to 24 meters.

Equipment manufactured over the years operates successfully in Ukraine, as well as in Kazakhstan, Kyrgyzstan, Moldova, Armenia, Poland, Lithuania, Bulgaria, Romania, and more.

The enterprise has received awards: multiple «gold» ratings as «Exporter of the Year», certificate and medal «Industry Leader», nominations «Quality Star» and «Choice of Ukraine», diplomas and honors as a winner of regional and national ratings "Conscientious Taxpayers".

HARVEST

Founded in 2013

Harvest

HARVEST – TOGETHER TOWARDS RECORD YIELDS!

HARVEST is a Ukrainian manufacturer of seeding and tillage equipment
that creates modern solutions for agribusiness.

Since 2013, we have been helping farmers work efficiently by offering machinery that combines simplicity, reliability, and precision.

Our machines are designed specifically for Ukrainian conditions – from fertile black soils to heavy clay.

Every detail is thought out: durable construction, high-quality materials, convenient adjustments, and easy maintenance.

PRODUCES:

We produce everything a modern farmer needs:

- Grain Seeders
- Precision Planters
- Field Cultivators
- Inter-row Cultivators
- Seedbed Compactors
- Strip-Till Systems
- Disk Harrows
- Rotary Harrows
- Knife Rollers
- Flex Harrows
- Spike Tooth Harrows

We are always by our clients' side – from the first call to the full launch of the equipment in operation.

We help choose the right implement for the specific conditions of the farm, provide setup, operator training, and ensure fast service support during the season.

We value farmers' trust and strive to make everyone who chooses HARVEST feel confident in the results.

Our production is certified according to the international ISO 9001:2018 standard, which confirms consistent quality and control at all stages of equipment manufacturing.

Our mission is to provide farmers with reliable Ukrainian machinery that increases production efficiency, preserves resources, and helps achieve consistently high yields.

Founded in 2013

TECHNOLOGY WHERE THE HARVEST BEGINS!

The company has developed 9 model lines of trailed and mounted equipment, over 90 models of agricultural machinery and equipment that meet European requirements.

At production facilities with a total area of over 10,000 m², equipped with European machinery and staffed by qualified personnel, unique designs are produced that allow the company to compete confidently in the agricultural machinery market.

PRODUCES:

- Grain-and-fertilizer seeders (variator drive)
- Grain-and-fertilizer seeders (gearbox drive)
- Universal row-crop seeders
- Disc harrows
- Rotary harrows
- Mineral fertilizer spreaders
- Universal row-crop cultivators
- Inter-row cultivators
- Spike-tooth harrows
- Wide-cut plows

The production facilities are equipped with modern European equipment.

About 50 highly qualified employees work at the enterprise.

More than 2,000 units of equipment sold.

Active participation in nationwide industry exhibitions (Kyiv, Poltava, Vinnytsia, etc.).

BILOTSEKIVMAZ

Founded in 2002

DEVELOPED WITH EXPERIENCE, BUILT TO WORK!

The company focuses on manufacturing equipment that helps farmers increase efficiency, reduce costs, and preserve soil fertility.

The production facilities cover more than 107.7 thousand m² of manufacturing space, which makes it possible to maintain a full production cycle—from engineering design and documentation to the assembly of finished machinery.

The company employs a team of engineers and designers who work on developing new machines as well as improving existing models to meet the needs of farmers.

PRODUCES:

- Mounted disc harrows AG, semi-mounted disc harrows AGP, trailed UDA harrows
- Mounted, semi-mounted, and trailed cultivators KN;
- Field and press rollers UGP
- Sunflower and corn headers
- Trailed spring harrow BPV
- Rotary Harrows BRZ
- Subsoilers GR
- Grain Cleaning Separators ZOM
- Trailed Sprayers
- Rotary Combines
- Mineral Fertilizer Spreaders

Production is organized in accordance with modern quality requirements. Every stage – from metal processing to testing of finished machinery – is accompanied by internal quality control.

The quality management system is certified according to the international standard ISO 9001:2008. All machinery has Ukrainian

certificates of conformity and also meets the requirements of the European Union and the technical regulations of the Customs Union.

Thanks to continuous improvement and a strong focus on market needs, the plant's products are used not only in Ukraine, but also abroad

TERFED

Founded in 2001

RELIABLE EQUIPMENT – SUCCESSFUL FARMING!

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

Innovative agricultural machinery for modern farming a leading manufacturer of tillage equipment in Ukraine and Across Europe. Our company stands at the forefront of agricultural machinery production, using innovative technologies to create reliable, efficient, and high-performance equipment for farmers.

Our Mission

To design and produce state-of-the-art tillage machinery based on advanced technologies in order to fully meet the needs of our customers and support sustainable agriculture.

PRODUCES:

We manufacture a wide selection of modern agricultural machines, including:

- Disc Harrows
- Cultivators
- Universal Trailers

Our production is certified according to the EN ISO 9001:2015, IDT standard, confirming high product quality, manufacturing precision, and operational safety.

- In-house production – quality control at every stage
- Warranty service – we take care of your machinery even after purchase
- Individual approach – tailor-made solutions for your farm's needs

Our product line is designed with the modern farmer in mind. It includes everything from compact disc and tooth harrows to wide-span machinery compatible with tractors of all power levels. We also offer a range of universal trailers for transporting headers and mineral fertilizer spreaders.

Choose reliability that's proven in the field.

We are trusted manufacturer of high-quality agricultural machinery

Agroremmash-Special Equipment (MaxiMarin)

Founded in 2009

QUALITY THAT BRINGS HARVEST!

The company holds a leading position in the horticulture and viticulture market in manufacturing of specialized equipment, such as: garden sprayers (trailed and mounted), pole setting machines, cutoffs, shredders, cutters, etc.

A well-maintained balance between the price of the product and its quality allows the agricultural producer to minimal costs for equipment, ensure uninterrupted operation of the enterprise, quickly pay for it and obtain a high-quality harvest.

The machinery and equipment, produced by the company are characterized by traditionally high European manufacturing and assembly quality, high reliability in operation, and the ability to work in different climatic zones, on different soils, and on any terrain.

PRODUCES:

- Sprayers for gardens and vineyards
- Equipment for processing the inter-bush strip
- Mowers
- Shredders
- Fertilizer applicators
- Mobile containers for applying liquid manure
- Forestry mulchers
- Forestry milling machines-rotators
- Forest strip pruners
- Vacuum cleaners.

A large-scale center pivot irrigation system is shown in operation over a field of sunflowers. The system consists of a long, straight metal structure supported by a series of vertical wheels or spacers, which are connected to a central pivot point. The structure is covered with a network of pipes and valves, and it is spraying a fine mist of water onto the crops below. The sunflowers are in full bloom, with their characteristic yellow petals and dark brown centers. The background is a soft, out-of-focus landscape with more sunflowers and a clear sky.

Variant Irrigation (Variant Agro Build LLC)

Founded in 2014

RELIABLE IRRIGATION – PROFITABLE FARMING

Company specialization – high-tech irrigation systems for fields with an area of 25 hectares.

Association of Manufacturing Enterprises of Machinery and Equipment for Agroindustrial Complex "Ukragromash"

The company is one of the largest production sites for wide-ranging irrigation systems

- 16 000 m² of production space;
- our own new hot-dip galvanizing shop;
- certified metal quality assessment laboratory;
- own warehouse with a full set of spare parts and consumables.

The team consists of almost 500 professionals who will help you select, manufacture and launch the most efficient irrigation system for your farm (400 production employees, over 20 designers in the design department).

PRODUCES:

- Hippodrome irrigation systems
- Pivot irrigation systems
- Linear irrigation systems
- Hippodrome irrigation system
- Remote control systems

The company implements projects comprehensively: from design to commissioning of equipment, warranty and post-warranty service.

The production uses components from leading world brands, including USM, Senninger, Nelson, Komet, Schneider Electric and others.

The company is certified according to ISO 3834 "Quality system in welding production", EN 1090 "CE marking of products" and ISO 9001 "Quality Management System".

High-quality hot-dip galvanizing of metal structures ensures a long service life of equipment in a wide variety of conditions.

The company has 3 representative offices in Ukraine (Kyiv, Kharkiv, Uzhhorod), 7 of its own installation and service teams, and its machines operate effectively in Romania, Bulgaria, Serbia, Hungary, Moldova, Slovenia, Croatia, and, of course, in Ukraine.

IRRIGATOR UKRAINE – EXPERT IN IRRIGATION

Innovative leader in design and production of drip irrigation systems

A subsidiary of the Israeli corporation Metzerplas, one of the world leaders in production of professional equipment for drip irrigation systems.

PRODUCES:

- A wide range of dripline with wall thicknesses from 6 to 46 mil (0.15 -1.15 mm) with different flow rates and distance between emitters
- Flexible PVC LayFlat hose Heliflex.
- Specially designed fittings for completing irrigation systems.

DRIP IRRIGATION FOR:

- Vegetable crops
- Orchards and vineyards
- Berries
- Industrial crops
- Greenhouse
- Subsurface irrigation

Yearsof experience in designing and implementing turnkey irrigation solutions:

- Design and installation of irrigation of any complexity.
- Technical support and consulting
- Non-standard engineering solutions for agricultural production
- Automated irrigation and fertigation systems with remote control
- A wide range of components for modern irrigation systems from world brands

Capacity is over 370 million meters per year.

Our own products confirm European quality standards and help agricultural producers conserve resources, increase yields and increase cultivation efficiency

The company is constantly upgrading technologies and expanding production capacities

«Mashzavod «Tehnika»

MASHZAVOD TEHNIKA

In business since 1994

WE ARE ALWAYS READY TO COOPERATE!

Pump units and pumping equipment. 30 years on the markets of Ukraine and abroad.

The company is a leading manufacturer of diesel pump units in Ukraine,
which solve a wide range of tasks: from irrigation of agricultural land
to pumping out wastewater.

The company specialises in the production of customised and serial pump equipment and has a powerful production base, including over 3,000 m² of warehouse space. A team of qualified specialists ensures the successful implementation of projects of any complexity.

PRODUCES:

- Pump units with diesel engines
- Pump units with electric motors
- Pumps
- Fire motor pumps.
- Components for pump units and pumps

In-house production allows us to create non-standard configurations and improve serial models. Our experienced team of engineers and skilled personnel are capable of designing and manufacturing pumping equipment for the most complex technical tasks of our customers.

Thanks to many years of experience, «Mashzavod «Tehnika» successfully cooperates with state, municipal and commercial enterprises both in Ukraine and abroad. The company's products are used in various sectors of the economy: metallurgy, chemistry, petrochemistry, agriculture, and public utilities.

One of the company's priorities is the development of the agricultural sector, which is the basis of the country's food security, and the implementation of irrigation solutions, which are critical for growing crops.

BOHUSLAVSKA SILHOSPTEKHNIKA

BOGUSLAV®

Founded in 1996

OUR MACHINERY WILL PROTECT YOUR HARVEST!

Machinery for agricultural professionals.

The company specializes in the production of machinery for crop chemical protection and the application of liquid mineral fertilizers. Thanks to the high quality of its products and the implementation of advanced technological solutions, it has become one of the leaders among sprayer manufacturers in Ukraine.

The production facilities are located in the center of Ukraine (the city of Bohuslav), a factory occupying 60,000 m² of land with convenient transport access. The territory includes three production workshops and administrative buildings. The workshops are fully equipped for production and are continuously being modernized to implement new manufacturing technologies.

The company's equipment fleet includes modern machining centers from leading international manufacturers in Europe, Japan, and China. This enables the production of products with consistently high precision. The company's resources cover the entire production cycle – from creating design schemes, manufacturing prototypes, and testing them, to serial production of finished machinery.

PRODUCES:

- Self-propelled sprayers
- Trailed sprayers
- Disc applicators
- Injection applicators

Currently, under the BOGUSLAV® trademark, the company manufactures self-propelled sprayers, 21 models of trailed sprayers, and machines for applying liquid mineral fertilizers.

All BOGUSLAV® products are CE certified, confirming that they comply with the essential requirements of EU directives and harmonized European standards, and that they have undergone conformity assessment procedures in accordance with these directives.

The company's team consists of highly qualified specialists who work with the latest software. The creation of new designs begins with 3D modeling and verification of all kinematic schemes. Structural strength calculations are carried out, taking into account the maximum dynamic loads that may occur during machine operation.

The company operates in both domestic and international markets. Imports include components from the USA, Italy, Germany, France, Switzerland, and Slovakia. Exports are directed to Kazakhstan, Lithuania, Romania, Bulgaria, Hungary, Moldova, and Poland.

RELIABLE FARM EQUIPMEN IS A SUCCESSFUL FARM!

Innovations for agriculture from a Ukrainian equipment manufacturer!

"Lvivagromashproekt" A.L.C. is one of the leading Ukrainian manufacturers of machinery and equipment for plant protection in Eastern Europe.

The constant development of agriculture and high-tech progress inspire us to create new, powerful, high-quality, and innovative machinery.

Utilizing many years of experience in designing plant protection machines, the company has developed and established the production of a wide range of products that meet the requirements and needs of modern agricultural producers of various scales.

TODAY WE CAN OFFER:

- Trailed sprayers with main tank capacity - 2500 l and 3500 l
- Sprayer rods - 18m, 21m, 24m, 27m, 28m.
- Seed treaters - Stationary and mobile. For small farms and professional seed plants.

Productivity from 1-3 t/h, 1-5 t/h, 3-20 t/h

- Grain loaders - 5 t/h, 20 t/h and 60 t/h
- Other equipment for chemical protection and disinfection with an individual approach to each client

Improving every year, we constantly create new types of modern seed treaters for chemical protection of plants. Our knowledge is based on our own more than half a century of experience, as well as on modern achievements of world science.

We use constructive elements of our own development, which ensure high quality of the equipment, careful seed coverage, disease prevention, simplicity and ineffectiveness in

operation, economy of toxic chemicals, all this together improves the ecological and high indicators of the grown crop. A wide model range of our seed treaters is oriented both for small farms and as professional equipment for seed factories.

Our offer takes your business to a new, higher level, providing quality coverage at a low price.

ALL COMPONENTS OF GRAIN STORAGE COMPLEX – ONE MANUFACTURER

First and the largest series production of grain storage equipment in Ukraine

PRODUCES:

- Flat bottom silos, hoppers, and silos for four. Up to 32 m in diameter. Storage capacity up to 42 000 m³. Hoppers for compound feed
- Temporary grain storages
- 100% automated grain dryers Brice-Bakers with capacity from 9 to 437 t/h
- Conveying equipment: bucket elevators, chain, belt and screw conveyors, - with capacity up to 200 t/h
- Grain cleaners with capacity up to 200 t/h
- Auxiliary equipment, etc.

SERVICES:

- Design
- Assembly
- The whole range of technical measures on commissioning
- Automation on a turnkey basis
- Training the customer's staff
- Service maintenance

Production facilities:

The facility is equipped with European, Japanese and American equipment lines.

The company may manufacture equipment for storing 2,000,000 tons of grain annually.

Has own departments including engineering, assembly, service and automation.

Over 600 employees in 2025.

Expertise:

More than 5,000 installations all over the world.

Both small elevator complexes and port terminals are important to us. We take an individual approach to every customer.

Over 15,000,000 m³ of storage have already been commissioned.

Over 500 grain dryers produced by KMZ Industries work in Ukraine.

Plant of Elevator Equipment

Founded in 1956

EQUIPMENT MANUFACTURER AND SOFTWARE DEVELOPER FOR THE GRAIN HANDLING BUSINESS

The company is a key manufacturing unit of the Grain Capital Group,
which provides a full range of services for developing a successful grain handling business.

The company is primarily known for manufacturing reliable transport equipment and high-precision dedusting filters.

The production technology includes not only high-performance lines and strict operational control, but also well-established business processes for information exchange between departments.

PRODUCES:

- Transport equipment, including enclosed belt conveyors
- Dedusting equipment
- Weighing equipment
- Equipment for grain intake and shipment
- Grain storage equipment (official dealer of the Spanish company Symaga)
- Gravity-flow equipment and metal structures of any complexity

ADVANTAGES:

- Provides a full cooperation cycle – from equipment design and production to installation, commissioning, and integration into grain handling and terminal operations
- Implements modern automation systems and develops unique software for the grain handling business – Osnova
- Provides technical support, maintenance, and personnel training
- Production is certified according to ISO 9001

We don't just manufacture equipment – we build partnerships.

From local grain storage facilities to international agroholdings and seaport terminals – we approach every project with responsibility and understanding of our clients' needs.

Our experience in implementing numerous projects allows us to flexibly combine standard and custom solutions, implement modern automation systems, and care for the environment.

RELIABLE PARTNER FOR YOUR AGRIBUSINESS!

Association of Manufacturing Enterprises of Machinery and Equipment for Agroindustrial Complex "Ukragromash"

The company has a long history and is currently recognized as one of the leading enterprises in the design and manufacture of equipment for grain and grain products. Its products combine high quality, absolute reliability and maximum safety.

The enterprise specializes in the development of comprehensive equipment for grain storage and grain processing factory.

Lubnymash manufactures and supplies grain storage silos, conveyors, bucket elevators, grain dryers, gravity flow equipment and auxiliary metal structures. The products meet modern requirements for reliability, energy efficiency and durability

PRODUCES:

- Quick-assembly grain storage facilities
- Silos with flat or conical bottom
- Hoppers for loading railway carriages
- Solid welded silos
- Hoppers for loading trucks
- Hoppers for compound feed lines
- Transporters and conveyors for grain and bulk cargo
- Grain dryers in different configurations
- Separators vibration and rotational types
- Distributors grain flow
- Loading ramps for transport and railway carriages

Technological base of the enterprise allows us to manufacture products of the highest quality and in a short time for specific customer tasks.

The enterprise provides full production cycle from design and manufacturing to installation and maintenance, introducing the newest technologies and constantly improving products in accordance with market needs.

The plant installs monitoring systems, that provide regular control over the quality of grain and its storage conditions, allowing timely measures to be taken to save product quality.

milling

The company has over 30 patented developments, allowing it to produce modern equipment for grain cleaning, as well as for flour and cereal production.

The company offers about 200 types of equipment and implements turnkey projects (from design to commissioning) for grain cleaning complexes, flour mills, and cereal plants.

PRODUCES:

- Grain cleaning complexes
- Universal aggregate hulling mills
- Universal complete hulling mills
- Buckwheat processing hulling mills
- Oat processing hulling mills
- Corn processing hulling mills
- Mills for wheat high-grade milling
- Grain cleaning machinery
- Technological equipment for flour production
- Technological equipment for cereal
- Aspiration equipment
- Gravity-flow equipment
- Laboratory equipment

The enterprise has implemented and uses the most advanced technologies in design, engineering, and metal processing, as well as in quality and overall enterprise management.

The technological level and organization of production allow for high product quality and the supply of products to more than 35 neighbouring countries and far abroad.

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

The Company manufactures, installs, commissions, adjusts, and maintains complexes for receiving, cleaning, drying, and storing agricultural crops

The Company's qualified specialists carry out the entire production cycle, from design to commissioning of equipment.

PRODUCES:

- Grain drying units
- Heat generators for grain dryers using various types of fuel: straw, wood chips, pellets, firewood, gas, liquid fuel
- Grain elevators
- Silos with conical and flat bottoms
- Auxiliary equipment (self-flowing equipment, swing valves, control cabinets)

Among the first Ukrainian companies starting supplying grain drying units to the European Union.

The products are manufactured in accordance with modern regulations and international standards. Warranty and post-warranty service is provided.

QUALITY TESTED BY YEARS AND FIELDS!

The Production and Design Association "MAANS" aims to manufacture products of consistently high quality at a reasonable price.

The main focus of PE PDA "MAANS" is the design and production of innovative, high-quality harvesting machinery that meets the highest standards of efficiency and reliability.

Highly qualified engineering and technical staff, along with modern equipment for cutting, bending, stamping, heat treatment, milling, welding, and metal polishing, allow the company to satisfy even the most demanding customers.

PRODUCES:

- Rapeseed tables
- Sunflower, soybean and corn headers
- Header transport trailers
- Spare parts and consumables for agricultural machinery

The products of PE PDA "MAANS" are patented, certified, and have passed all necessary tests. They also feature a wide model range, allowing them to be aggregated with machinery from well-known brands such as Claas, John Deere, CAPELLO, New Holland, Case, and others.

The company operates modern and functional production facilities with an area of 9,000 sq. m, equipped with state-of-the-art machinery from world-renowned brands - HAAS, Amada, Pierce, Heckert, Weidotherm, VEKA-MAK, SciTeeX, Fronius, Castoline, AKM-1500.

The company's products are competitive in terms of quality, cost, and reliability and are in high demand not only in Ukraine but also in the European market. Currently, cooperation has been established with Germany, Slovakia, Romania, Hungary, Bulgaria, and Poland.

HEAVY LOADS START WITH TAD!

The company is the leading producer of heavy-haul and specialized trailers in Ukraine and Eastern Europe, ensuring superior quality and unmatched reliability

We offer a wide range of trailers, from 2 up to 25 axles, with payload capacities reaching 250 tons, ensuring efficient transport of diverse cargo both domestically and across international markets.

We offer an extensive lineup, including our Module, Classic, Telescope, Jumbo, Mega, and Trailer series. Every model is highly customizable, with various equipment options, load capacities, and configurations to meet diverse client needs and ensure maximum operational flexibility

PRODUCES:

- A diverse range of trailers for all cargo types
- Grain Haulers
- Dump Semi-Trailers
- Heavy-Haul Trailers for Agricultural Machinery
- Tractor Trailers
- Custom-Built Specialized Trailers

Our manufacturing process utilizes only high-grade metals (S350-S690-S900) and premium components from leading global suppliers (BPW, WABCO, JOST, TRIDEC). Furthermore, we employ state-of-the-art welding equipment (FRONIUS), including semi-robotic processes, to ensure superior quality

Supported by a young and professional team, high production organization, and a strong work ethic, we consistently create competitive machinery for both the Ukrainian and international markets

EVERLAST

EVERLAST
TANK VEHICLE
MANUFACTURER

Founded in 2002

THE №1 MANUFACTURER OF TANK TRAILERS IN UKRAINE

Everlast is a Ukrainian manufacturer of truck trailers and semi-trailers for transporting gas, as well as food-grade, chemical, and petroleum products.

The company produces custom-made tank trucks for transporting liquids and liquefied gases made of stainless, aluminum, and carbon steel, suitable for various types of products such as liquefied petroleum gas, ammonia, food and chemical products, fertilizers, and petroleum products.

Currently, 15 models of tank trucks are developed and produced in over 200 modifications.

Since 2004, each type of our product has gone through a complex and lengthy process of development, design, testing, and refinement.

As a result, we are able to design and manufacture tank models, semi-trailers, and tank trucks in a wide range of configurations that meet the needs of various market segments.

PRODUCES:

- Tankers for dark petroleum products
- Tankers for food products
- Tankers for light petroleum products
- Tankers for chemical products
- Tankers for liquefied gases
- Tankers for liquid manure

SERVICES:

- Tank truck repair
- Sale of spare parts and components

Company advantages:

Ukrainian manufacturer.

European-level product quality.

Everlast equipment is designed according to the specific needs of the Ukrainian market.

3-year manufacturer's warranty.

After-sales service and technical support.

Kobzarenko – a family business

Founded in 1993
Production in Poland since 2020

UKRAINIAN & POLISH PRODUCTION – EUROPEAN QUALITY!

Leading manufacturer of tractor trailers in Ukraine with 30 years of experience

More than 200 models of wheeled equipment have been developed.
The equipment meets European requirements.

PRODUCES:

- Chaser bins
- Push off trailer "ATLANT"
- Dump trailers
- Manure spreaders
- Fertilizer spreaders
- Self-loading bale trailers
- Platform trailers
- Belt loaders
- Ground chaser bin
- Mobile unloader for train wagon
- Grain baggers
- Grain unloader
- Mobile dissolve-filling station
- Slurry tankers
- Special trailers
- Municipal, woodworking, construction equipment.

The company exports to 32 countries around the world (Europe, Africa, Australia).

It has a dealer network in 30 countries around the world and a service center in Poland.

Active participant in foreign international industry exhibitions - Agromek (Denmark), Agritechnica (Germany), Salon des ETA (France), Fieragricola (Italy), AgroShow (Poland), etc.

Production facilities are equipped with modern European equipment.

The company employs about 900 highly qualified personnel.

On 300 hectares of our own farmland, we are testing our own production equipment.

More than 17,000 units of equipment have been sold.

In 1993, Anatoly Kobzarenko started the production of garden carts in his garage, eventually grew into a leading manufacturer of agricultural equipment on the Ukrainian market and opened the way for his company to sell on the global market.

Today, the Kobzarenko Group of Companies is a family business that is continued by Anatoly's children – Dmytro and Maria. The group of factories has large capacity for production and storage of products that provides agricultural, utility and logistics sectors needs on a daily basis.

Production facilities with a total area of 40,000 square metres are concentrated in three locations in Ukraine (the towns of Lypova Dolyna, Romny, and Kovel), as well as at a plant in Poland.

EGRITECH

**EGRITECH**

Founded in 2017

EGRITECH IS EUROPEAN QUALITY**AT A UKRAINIAN PRICE!**

The company is a recognized manufacturer of agricultural machinery, which constantly implements innovative solutions to increase the efficiency of agricultural work. The wide range of products includes tractor and truck trailers, grain packing and unpacking equipment, as well as grain bunkers-overloaders.

The company's agricultural machinery significantly facilitates and accelerates the processes of harvesting and processing crops, which is critically important for the agricultural sector. In particular, grain bunkers-overloaders provide mechanized transportation of crops from the field, minimizing the cost of time and human resources.

PRODUCES:

- Grain carts
- Dump trailers
- Aluminum tipper semi-trailer
- Push-off trailers
- Grain packing machine
- Grain bag unloader

Each model of agricultural machinery is a unique business solution, created according to individual calculations and international standards, taking into account maximum cross-country ability, load on the equipment, the peculiarity of the location of grain storage facilities and the landscape of the field.

Grain packaging machinery "Egritech" plays a key role in the correct and effective storage of grain, preserving its quality and providing optimal conditions for long-term storage.

D-LIGHT

Founded in 2002

CREATING NEW TRADITIONS IN GLOBAL MACHINE-BUILDING,
WE VALUE OUR EMPLOYEES AS MUCH AS OUR CLIENTS.

D-LIGHT is a Ukrainian machine-building company.

For over 20 years, the company has been manufacturing automotive, trailer and manipulator special equipment and offers over 200 models of trailers and special equipment for the agricultural, forestry, construction and logistics sectors.

PRODUCES:

- Forestry machinery: timber trailers, forest cranes, wood chippers, log splitters, and tree pullers
- Municipal machinery: mini-loaders, mulchers, fire-fighting equipment, and municipal utility vehicles
- Agricultural machinery: grain trucks, grain transfer trailers, and container tippers
- Construction and transportation equip-

ment: multilift systems, calibration (weighing) trucks, hook-lift and cable cranes

- Scrap metal recycling equipment.
- Tractor trailers with manipulators.
- A wide range of trailers and semi-trailers
- Truck-mounted cranes and vehicle superstructures

The company has established a complete production cycle, including: metal cutting, welding, shot blasting, painting, assembly, testing, and service. Its own design bureau develops customized innovative solutions according to client needs. The company provides warranty and post-warranty service.

Over 250 employees work in 10,000 m² of production facilities. All products and production processes are certified to international standards, which allows the company's machinery and equipment to be in demand both in Ukraine and across Europe.

Verkhnyodniprovsky Autorepair Plant (VARZ)

VARZ

Founded in 1971

WE CREATE TECHNOLOGY AND BUILD MACHINERY

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

Today, the company produces more than 140 different types of trailer equipment to meet the needs of various industries and transport sectors.

The company manufactures trailers and semi-trailers for various purposes. The model range includes a large number of units and is expanding daily to keep pace with the rapid development of modern technologies and respond quickly to changes.

At the same time, European components and the most modern assembly lines are used.

The company has an in-house design office. This allows it to create new (or customize existing) trailer designs to meet functional, operational, and other customer-specified requirements in a short period of time.

PRODUCES:

- Tipper semi-trailers with a volume of 22 to 60 cubic meters
- Heavy semi-trailers with a load capacity of up to 100 tons
- Flatbed and tent semi-trailers
- Semi-trailer container transporter
- Timber semi-trailers
- Flatbed trailers.
- Chassis for the construction of tanks, bodies, etc.

The company supplies not only standard equipment to the market, but also bespoke equipment at affordable prices, offering the best of what has been developed by specialized factories in Ukraine, Germany, Austria, and Spain.

More than ten service stations in Ukraine are equipped with everything necessary for fast,

high-quality service, warranty, and post-warranty repairs. The staff is highly qualified and has extensive experience in solving the most complex tasks.

The company provides a 12-month manufacturer's warranty for vehicles, as well as for axle assemblies and individual units for up to 36 months.

Company "Patron-Auto"

Founded in 2024

Company "Patron-Auto" has modern production facilities covering an area of 20,000 m², advanced engineering staff, and a commitment to the continuous implementation of new modern solutions.

PRODUCES:

- Heavy trucks (trawlers)
- Municipal equipment
- Dump trucks
- Flatbed trucks
- Container trucks
- Crane manipulators
- Timber trucks
- Truck cranes
- Grain trucks
- Grain trucks
- Poultry trucks
- Feed distributors
- Fuel tankers
- Wide range of trailer and mounted equipment

Production facilities are located in Kyiv, Dnipro, Kremenchuk and Romania.

The plant has 13 service centres throughout Ukraine and provides a 2-year warranty on all equipment of its own production.

Company "Patron-Auto" continues the traditions of machine building in Ukraine and offers a wide range of its own equipment, from automotive and agricultural trailers and semi-trailers to vehicles with crane manipulators, auto towers, truck cranes,

and more, providing a complete production cycle that includes the development of innovative solutions in the field of mechanical engineering and their implementation in finished units of equipment.

Agro Kar Ukraine

Founded in 2009

AGRO KAR – YOUR RELIABLE PARTNER!

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

The company specializes in the production of trailed agricultural machinery and tractors.

PRODUCES:

- Trailed agricultural machinery
- Tractors with a power of 60 to 105 horsepower under the Spike brand

Spike machinery is quality made accessible to the Ukrainian consumer.

The tractors are manufactured using Ukrainian components and parts of our own production.

The company offers a wide range of agricultural machinery and spare parts – from combines to sprayers – supplied by leading global manufacturers such as John Deere, Case, Kinze, and many others.

The company is also engaged in the production of spare parts for agricultural machinery.

Engineers and specialists work to ensure the highest quality and reliability of every component.

Our own production facilities allow us to respond quickly to market demands and offer spare parts at competitive prices.

Kharkiv Tractor Plant

Founded in 1931

OUR MOTTO – EFFECTIVE OPTIMALITY!

The Kharkiv Tractor Plant is a manufacturer of tractors with a virtually closed cycle. The plant has many years of experience in the design, implementation, warranty, and post-warranty service of equipment.

For decades, KhtZ products have been in high demand not only in Ukraine, but also in many countries in Europe, Asia, North and South America, and Africa.

Over the years, the plant has produced more than 3 million tractors, which have always been distinguished by their reliability, functionality, and high quality of manufacture.

PRODUCES:

- Wheeled agricultural tractors power from 180 to 250 hp
- Track-type tractors
- Drilling and crane machines
- Shunting tractors
- Mulchers

Production capacity of 300 tractors per year.

COMPANY ADVANTAGES:

- More than 90 years on the global market
- Possibility of customization according to customer requirements
- Technical support and consulting during the warranty and post-warranty periods;
- Availability of spare parts.

KhTZ products are certified and comply with quality standards.

Continuous modernization of equipment and introduction of the latest production technologies contributes to the development of new sales markets

**ALFATEKS**

Founded in 1999

**ALFATEKS MACHINERY –
AN INVESTMENT IN RELIABILITY, QUALITY,
AND LONG-TERM OPERATION!**

The company has been successfully operating in the market for over 26 years, providing reliable vehicles to municipal sector enterprises, public utilities, energy companies, as well as the agricultural, road, and construction industries.

The company is a large machine-building complex with a full production cycle – from the development of technical documentation to the release of finished products. The priority of our production is the use of the highest quality materials and components from leading global and domestic manufacturers.

The production facilities, which are regularly updated with modern equipment, have a well-established cycle of design and production of municipal and other special equipment.

The Kremenchuk Municipal Equipment Plant ALFATEKS has also mastered the assembly of DAYUN chassis with a carrying capacity of 3.5 to 25 tons.

PRODUCES:

- Garbage trucks;
- Combined vehicles;
- Dump trucks;
- Snow removal, sand and salt spreading vehicles;
- Vacuum trucks;
- Emergency workshops;
- Aerial platforms;
- Sludge suction trucks;
- Sewer cleaning trucks;
- Truck cranes;
- Tank trucks;
- Sweeping and cleaning trucks;
- Watering and washing trucks;
- Dropside trucks, curtainsiders, box vans;
- Other special vehicles..

The certified service station provides repair and maintenance services for all types of trucks and special vehicles.

The company has mastered the assembly of the entire DAYUN chassis model range with 4x2, 4x4, and 6x4 wheel configurations. Localization of production in Ukraine allows for better adaptation of products to the needs of the Ukrainian market.

MACHINERY AND EQUIPMENT FOR LIVESTOCK AND POULTRY FARMING

SPD Petrov plant
BRATSLAV

SPD Petrov plant

Founded in 2007
Production since 2009

**EVERYTHING RELATED TO MANURE
MUST RELATE
TO THE EQUIPMENT OF SPD PETROV!**

The SPD Petrov plant manufactures a whole ecosystem of equipment for working with manure, which converts livestock waste into organic fertilizer for crop production.

PRODUCES:

- Manure conveyors
- Vacuum tanks for liquid fertilizers
- Scraper conveyors
- Feed dispensers
- Manure trailers
- Gearboxes for agriculture
- Manure spreaders
- Spare part

The plant independently develops and manufactures machinery and equipment at its own production facilities, providing after-sales service for its products.

The plant produces a full range of spare parts for equipment for working with manure. Thousands of items are available, including components for TSN conveyors, various types of scrapers, manure spreaders, and other trailer equipment.

The plant has certified production according to the ISO 9001:2015 quality management system, and the trailer equipment is certified in accordance with Directive 2006/42/EC of the European Parliament and of the Council. The company's products are exported to more than 30 countries.

BRATSLAV

Founded in 1979

WE MAKE YOUR WORK EASIER!

The company unites 16 enterprises in Ukraine, Poland and other countries, offering a full range of services: from scientific research and design to production, installation and maintenance of equipment and machines.

Today, the company is the largest multi-profile industrial plant in Ukraine, developing traditional business projects and opening new ones that go beyond the existing territories. The main

specialization is agricultural and industrial equipment, ground logistics facilities, industrial components, various metal and plastic products, including large-sized ones.

PRODUCES:

- Farm complexes
- Granaries
- Warehouses
- Milking parlors and installations of various types
- Stable equipment for tethered and untethered housing
- Tunnel ventilation systems
- Manure removal equipment (scraper units, conveyors)
- Lighting systems
- Bed formers
- Garden platforms and garden carts
- Trailers and semi-trailers
- Feed mixers-distributors

The company is actively developing the export sector, presents its products at international exhibitions and has established itself as a flexible, reliable partner and manufacturer of high-quality equipment.

Bratslav is certified according to the international standard ISO 9001, which confirms the high level of quality of products and services. The company actively implements the latest technologies, in particular in the field of automation and digitalization of production processes.

A.TOM®

Founded in 2015

LEADING MANUFACTURER OF ATTACHMENTS AND TRAILED EQUIPMENT FOR AGRICULTURAL AND SPECIAL MACHINERY

A.TOM Attachments is a Ukrainian manufacturer of attachments and trailed equipment
for tractors, loaders, excavators, and other machinery.

Part of the A.TOM Group, the plant builds on years of experience in the agricultural and industrial sectors. Since producing its first bucket in 2015, the facility has expanded to 7,000 m², with a range of over 250 models and more than 11,000 units manufactured.

PRODUCES:

- Universal and agricultural buckets (for grain, root crops, compost, branches, big-bag filling, etc.), construction, and grading buckets
- Excavator and clamshell buckets
- Wood-handling attachments: stump pullers, saws, grabs, pruners
- Agricultural attachments: grabs, forks, cutters, and blades (for bales, wood, silage, and grain)
- Organic waste processing and application

equipment: compost turners, manure mixers, applicators, fertilizer spreaders, and pumping stations;

- Municipal equipment: brushes, blades for dirt and snow removal
- Graders
- Three-point linkages
- Crane booms
- Working platforms

SERVICES:

- Manufacture of attachments and trailed equipment – both from the standard product range and custom-made options
- Processing of farm waste and field application of organic fertilizers using drag hose/umbilical systems
- Composting of organic waste with subsequent field application of the compost as fertilizer.

- Pumping and field application of digestate (filtrate) as fertilizer for various crops
- Maintenance and repair of special, agricultural, and road machinery
- Repair and restoration of feed mixers and other agricultural machinery
- Production of pins and bushings for special machinery

WHEN QUALITY MATTERS!

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

The company's products include agricultural soil cultivation machinery such as rotary hoes, equipment for telehandlers, header transport trailers, and front tractor weights.

Combining modern technologies with production capabilities, the company develops equipment that meets the latest requirements for high-quality crop cultivation and improved yields.

The company's products are designed to make farmers' work easier, reduce the use of herbicides, and increase the profitability of agricultural production.

PRODUCT RANGE:

- Hydraulically folding rotary hoes
- Rigit-frame rotary hoes
- Trailed graders
- Header transport trailers
- Front tractor counterweights
- Work platforms (baskets) for telehandlers
- Buckets for telehandlers

COMPANY ADVANTAGES:

- Swedish SSAB steel is used in manufacturing
- Continuous search for innovative design solutions
- 24/7/365 customer support

The company's machinery is well-known for its reliability and efficiency, both in Ukraine and abroad.

CLEAN FIELD

Founded in 2011

**PRESERVING HARVESTS,
CARING FOR NATURE AND THE FUTURE!**

Manufacturer of polyethylene bags for grain storage, feed harvesting,
and specialized equipment for their efficient use.

PRODUCES:

- Polyethylene bags for grain and feed storage
- Equipment for handling storage bags – film and bag winders

We provide services for loading grain and feed into flexible polyethylene bags for long-term storage using machinery from leading Ukrainian and international manufacturers.

Since 2012, Clear Field has been the first company in Ukraine to initiate a recycling program for agricultural polyethylene storage bags.

This program, titled "Save Nature – Save Money", encourages our customers not to burn, discard, or bury polyethylene waste, but to return it for a reward.

COMPANY ADVANTAGES:

- High Quality: Only virgin polyethylene raw materials are used, ensuring the reliability and safety of our products.
- Environmental Responsibility: A careful approach to recycling, using specialized equipment designed and manufactured by our company.
- Innovation: Proprietary patented vertical polyethylene corrugation technology that provides unique performance characteristics for our storage bags.
- International Recognition: Active participation in leading global agricultural exhibitions such as Agritechnica (Germany) and Canada's Farm Show (Canada), among others.

The company manufactures truck scales designed for static weighing of vehicles
with a total weight from 30 to 100 tons and a load-receiving platform
length ranging from 6 to 24 meters.

PRODUCES:

The company produces truck scale models:

- ST - universal scales for most applications
- EU - the most popular Ukrainian scale model in Europe

- PR - technological scales with a reinforced platform resistant to heavy loads
- GR - scales resistant to extreme operating conditions and continuous loads
- Smart systems "USC SPIRIT".

COMPANY ADVANTAGES:

- Own modern production facility of 4,000 m²
- Certified accuracy and reliability
- Turnkey installation of truck scales
- Innovative smart system "SPIRIT"
- 10-year platform warranty

The company's products are sold in Ukraine and exported to 17 foreign countries.

HYDRAULIC POWER UNIT, HYDRAULIC CYLINDERS AND ASSEMBLED HIGH-PRESSURE HOSES

in particular:

We specialize in the design and production of hydraulic, lubrication, and pneumatic systems, using components from top European manufacturers – trusted for their proven quality and reliability

We operate our own machine park for the production of hydraulic manifolds and cylinders, and we maintain the largest hydraulic components warehouse in Ukraine: over 14,000 items and more than 1,000,000 units in stock. Our solutions are used across 20+ industrial sectors.

We design and manufacture:

- Hydraulic power units
- Test benches
- Hydraulic manifolds
- Mobile filtration units
- Hydraulic cylinders
- Lubrication systems based on custom technical specifications
- Mini power packs
- Pump-motor groups
- Diagnostic kits
- Assembled high-pressure hoses

Every second manufacturing company in Ukraine uses Motorimpex hydraulic systems. We've grown from a small components supplier into a key player with a 50% share of the Ukrainian power hydraulics market.

Our in-hands stock exceeds €10 million in value – pumps, motors, valves and dozens of other components – we supply from 80 brands and integrate into our solutions.

Today, Motorimpex is 140 people – including an engineering core with 15 Master's and 3 PhDs in hydraulic drive technology.

Our dealer network includes 60+ sales points across Ukraine.

We've established the Hydraulics and Pneumatics Academy for customers looking to train their personnel in the effective use of hydraulic and pneumatic equipment.

Our products are CE certified, and our manufacturing is ISO 9001:2015 certified.

Motorimpex solutions are already used by clients in UAE, Moldova and Poland, Czech Republic, Italy, UK and Canada. Saudi Arabia, Sweden, Belgium. This autumn we collaborate with Norway and Spain.

We bring Easy Access to Superior Hydraulic Expertise to each industrial sector

INTELLIGENTLY INTEGRATED POWER SYSTEMS!

Our Components - Your Prosperity
Components for Fluids Transfer and Measurement

The company is a subsidiary of the Italian industrial group BONDIOLI & PAVESI, one of the leaders in the production of power transmission components for machinery.

PRODUCES:

- Drive shafts
- Gearboxes
- Multipliers
- Hydraulic valves
- Axial piston and gear pumps and motors;
- Heat exchangers.

SERVICES:

- Technical support
- Commercial solutions
- Service
- Flexible logistics

Production areas:

- 1,000 m² of production and warehouse facilities on a 10,000 m² site
- Professional Equipment for Component Production and Repair
- Authorized Service Network Across Ukraine

The warehouse facilities are equipped with specialized equipment for the repair and pre-sale preparation of mechanical and hydraulic components. This ensures maximum flexibility in deliveries, as well as the ability to make modifications to components or systems according to the technical requirements of our clients.

Qualified personnel and a wide range of products available in stock enable us to quickly meet the needs of discerning customers.

**Reliable Manufacturer and Supplier of Drive and Hydraulic Solutions
for the Agro-Industrial and Industrial Sectors**

BAS-AGRO GROUP

Founded in 2018

**MANUFACTURER OF RELIABLE SPARE PARTS
FOR AGRICULTURAL MACHINERY**

Association of Manufacturing Enterprises of Machinery
and Equipment for Agroindustrial Complex
"Ukragromash"

BAS-AGRO GROUP is one of the leading manufacturers of spare parts
for agricultural machinery in Ukraine.

Our areas of activity

The main specialization of the company is the production and supply of spare parts for machinery used in:

- sowing;
- harvesting;
- ospraying and applying mineral and organic fertilizers.

In particular, we manufacture components for corn and sunflower headers, seeders, sprayers, fertilizer spreaders, and combines.

Quality you can trust

Our principle is to create spare parts as close as possible to the original ones:

- in appearance;
- in physical properties;
- in dimensional and shape accuracy;

To achieve this, we use high-quality materials, modern technologies, and a team of highly qualified specialists.

Our technologies

- CNC laser cutting
- Electrical discharge machining (EDM)
- CNC bending
- CNC turning and milling
- Laser desposition
- Powder coating
- Gear cutting and other high-precision operations

Our assortment

We offer a wide range of spare parts – more than 3,000 items. Popular positions are almost always available in stock, and you can find the full assortment on our website.

Cooperation with us

We will be glad to help you with any questions!

bas.ua

A technical line drawing of a mechanical assembly. It features a large gear on the left side, meshing with a smaller gear or shaft. The central part of the drawing shows a cross-section of a shaft or housing, with various internal components and layers indicated by hatching and lines. The drawing is detailed, showing threads, flanges, and internal structural elements.

RESEARCH INSTITUTIONS

Leonid Pogorilyy Ukrainian Research Institute for Forecasting and
Testing of Machinery and Technologies for Agricultural Production

Institute of Mechanics and Automation of Agricultural Production
of the National Academy of Agrarian Sciences of Ukraine

Leonid Pogorilyy Ukrainian Research Institute for Forecasting and Testing of Machinery and Technologies for Agricultural Production

Founded in 1948

FROM IDEA TO IMPLEMENTATION!

Association of Manufacturing Enterprises of Machinery and Equipment for Agroindustrial Complex "Ukragromash"

The Institute is the leading organisation for testing agricultural machinery, conducting scientific and technical expertise of technologies for agricultural production, developing and optimising technologies for growing perennial energy crops, and forming scientifically sound prerequisites for the implementation of technical policy in the agricultural sector of Ukraine's economy.

The institute comprises an accredited testing center and certification body for agricultural machinery, 11 research departments and laboratories, as well as three regional branches: Lviv, Kharkiv, and South Ukraine.

The main goal is to transform scientific research into effective support for farmers and producers.

AREAS OF ACTIVITIES:

- Testing and certification of agricultural machinery
- Testing of unique special equipment and gear for military needs
- Technical support for the development of agricultural technical equipment and components
- Development of technical regulations and harmonization of European standards
- European certification and integration of Ukrainian machinery into the European market
- Expertise in agricultural technologies to increase plant resistance to climate change and increase crop yields
- Research on the restoration of agroecosystems on militarily disturbed soils
- Development of bioenergy to ensure Ukraine's energy independence
- Research of advanced technologies in animal husbandry

The Institute is a full member of the International Club of Agricultural Engineers in Bologna (Club of Bologna) and a member of the Organization for Economic Cooperation and Development (OECD).

We combine SCIENCE, TECHNOLOGY, and PRACTICE to ensure that Ukraine's agricultural sector is strong, competitive, and ready for the challenges of the future.

KVANT-12 cultivator for organic farming

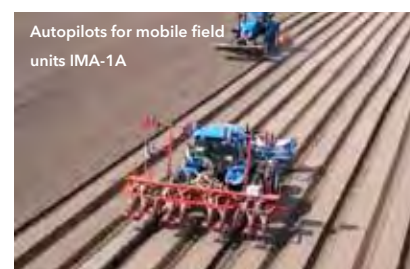

Institute of Mechanics and Automation of Agricultural Production of the National Academy of Agrarian Sciences of Ukraine

Founded in 1930

SCIENCE THAT WORKS IN THE FIELD!

New developments of the Institute:

The Institute of Mechanics and Automation of Agro-Industrial Production of the National Academy of Agrarian Sciences of Ukraine, whose staff has always strived and continues to strive to solve complex scientific and technical problems in an original way, sometimes even ahead of its time, strives to be at the forefront of scientific research.

The Institute of Mechanics and Automation of Agro-Industrial Production of the NAAS (a state research institution) provides contractual services for the development of technological processes for the production of agricultural products, their primary processing and storage, as well as the latest technical means for their implementation.

Since its inception, the Institute has had an organic connection with agricultural production and actively responds to production requests regarding the effective use of domestic and imported equipment, maintaining it in working order, and creating new equipment.

Currently, the Institute is studying the patterns of energy-efficient processes of mechanical action of machine working bodies on the soil environment, technological materials, plants and their crops, including with the aim of ensuring comfortable conditions for the growth and development of both plants and animals, reducing the negative impact on the environment, and, based on the results obtained, creating the latest technical means, including automated working bodies and robotic systems, with computerised control and monitoring of technological operations.

The Institute's team is characterised by a high level of professionalism, a balanced composition, a high level of creativity and persistent work ethic, and ensures effective cooperation with more than thirty agro-industrial machine-building enterprises.

Also among the Institute's developments are:

- Information system for monitoring and forecasting grain moisture during harvesting
- Air purification and disinfection systems
- Control unit for the cooling system of livestock premises
